Committee Members,

Although I can not attend today's meeting I am writing in support of HB 4116 and HB 4453 and ask that both be passed out of Committee to receive a vote.

HB 4116 creates a check and balance for Memorandums of Understanding that has been lacking. This check and balance is vital to insure that contracts that are violate our Constitution and/or additionally not in the best interest of Michigan's citizens, will not be entered into without any oversight.

HB 4453 is fundamental to Michigan's economic growth and welfare as private business provide the jobs that fuel our economy. Governmental over reach into the private sector exceeds government function, promotes unfair competition and has shown to cost the taxpayers more taxes.

Please enter into the public record

Thank you
